Hunt planning worksheet

Plan a small activity before entering it in the builder. This original organizer worksheet holds intended answers and review rules; keep the completed host copy separate from player instructions. It is a blank planning tool, not a played event or a route checked at your venue.

Activity brief

What should participants do or learn?

Group and delivery arrangement

Named help contact and how to ask

Exact finish instruction and stop/exit option

Use an actual approved sign, supplied picture or fictional notice when a task needs context. Verify a real target and approach before using a location. A blank field means the decision is still open.

Task 1

Actual supplied material or verified permitted target

Exact player prompt

Intended answer, proof or discussion/review rule — host copy

Hint, help or equivalent alternative

Task 2

Actual supplied material or verified permitted target

Exact player prompt

Intended answer, proof or discussion/review rule — host copy

Hint, help or equivalent alternative

Task 3

Actual supplied material or verified permitted target

Exact player prompt

Intended answer, proof or discussion/review rule — host copy

Hint, help or equivalent alternative

Rehearsal and next decision

Ask a fresh reader to use the intended player instructions. Check the expected answer, review arrangement, help and final action. Record the actual device and result in the pilot checklist. A proposed prompt is not an observed customer outcome.

What worked, what needs fixing and who owns the next step?

For browser delivery, enter tasks manually using the creation tutorial, or open the practice builder. This worksheet does not import tasks or save platform results. Filled fields stay only in this page until it closes; nothing is saved or submitted by this worksheet.
